only

$799

Includes free carrying bag

All but one of the software applications are located on a single ROM chip that plugs into the NEC PC-8201. Since none of these applications requires more than 5K of RAM to operate, you have at least 27—and up to 31—of the 32K of memory in the computer left for data. And with the portable disk drive, you can easily transfer files back and forth between the computer and 3½-inch disks. You can even print disks files that are too large for the computer.

With the Ultimate ROM II chip, you get a word processor, a relational database, an outline processor, and a display enhancement that allows you to view 60 columns of characters on the screen at once—up to 80 columns with scrolling. On a 3½-inch disk you get a utility program that communicates between the laptop computer and the portable disk drive. See page 4 for details.

By purchasing LAPDOS along with this package, you can use the portable disk drive with any IBM PC or compatible computer with an RS-232C serial port. Just connect the computer to the disk drive, and transfer files back and forth between the two! Information you compile on your portable becomes available on your desktop computer for use with your favorite word processor, database, or spreadsheet.

To make your decision easier, Traveling Software is offering a 30-day, money-back trial period: Try our system at your leisure, and if you are not convinced that you are getting the best laptop system available, return the package within 30 days for a full refund.

What you get for $799:

- NEC PC-8201 laptop computer with 32K memory, weighing 3.9 lbs
- Five applications on the Ultimate ROM II plug-in chip (page 4)
- Portable battery-powered disk drive, weighing 1.9 lbs (page 5)
- TS-DOS disk operating system (page 5)
- A/C power adapter
- Free carrying case with shoulder strap

Options:

- Additional 32K CMOS built-in memory—$100
- LAPDOS software and cable converter for using the portable disk with IBM PCs—$89.95 (page 5)
- Battery-powered 80-column Epson-compatible printer weighing only 2.2 lbs—$129 (page 9)
- 128K Sidecar memory cartridge—$235 (page 11)

Dear Laptop Computer Owner:

After more than three years of developing and selling software and hardware products for the new generation of battery-operated computers, we at Traveling Software have put together a comprehensive collection of portable computer products. Our goal: to provide our customers a convenient, one-stop source for all their portable computing needs.

Here are some highlights of this first issue:

- ✓ A complete system: the 6-pound package on the opposite page. Check it out for a remarkable bargain on a laptop computer, portable disk drive, integrated ROM software, and carrying case!
- ✓ IBM data compatibility: LAPDOS, our newest product, allows you to connect the portable disk drive to any IBM PC or compatible and transfer files between your desktop and portable computers. See page 5 for the various ways in which you can interchange files from desktop programs like ThinkTank, SideKick, WordStar with files from laptop programs like IDEA!.
- ✓ Portable disk drive: weighs only 1¾ pounds and comes complete with software, for only $229. See page 5.
- ✓ Communications: the TravelComm 1200 baud modem, battery-operated and weighing only 6 ounces; the amazing BlackJack phone connector; and the new version of the widely acclaimed Telecommuter communications software. See page 8.
- ✓ Memory expansion: everything from 8K and 24K expansion chips to the PG Design 64K memory bank, which allows a Tandy Model 100 to be expanded to a total of 96K of memory. See page 11.

And, of course, we offer our complete line of Traveling Software products, both cassette and disk versions. See pages 6 and 7 for descriptions.

We hope you enjoy our catalog. Call us if you have questions.

Sincerely yours,

The Traveling Software Staff

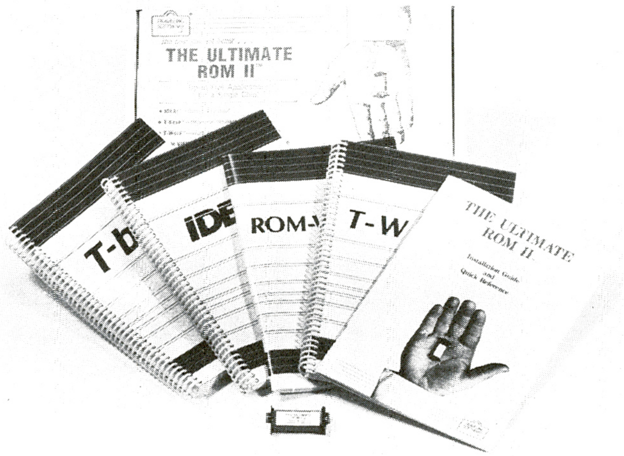
"For people who are going places"™

TRAVELING SOFTWARE®

The Ultimate ROM II

We set the standard! With the Ultimate ROM, Traveling Software set the standard for packing the most powerful software into a ROM chip. Now, with the Ultimate ROM II, we're setting new standards.

Five applications on one chip! Only $229.85



The Ultimate ROM II

for the Tandy 100/200
NEC PC-8201
Olivetti M10

Five Applications:

- **ROM-View 80:** Full text editing in up to 80 columns (not available for the Tandy 200)
- **T-Word:** An easy-to-use word processor with considerable functionality
- **IDEA!:** The best-selling outline processor for laptop computers, in a faster, more powerful version
- **T-base:** Rated as the best database for the Tandy and NEC portable computers, now faster and more wonderful
- **Portable Disk Drive Support:** Built-in support for the Tandy and Purple Computing portable disk drives

Requirements: A computer with at least 16K of RAM; printer optional.

30-Day Guarantee: Order the Ultimate ROM II today. If you are not completely satisfied, return it within 30 days, and we will refund your money—no questions asked.

Five applications that occupy only one file position on your laptop computer!

- **ROM-View 80** displays up to 60 characters per line—80 characters with scrolling—instead of the usual 40. Can be used in all Ultimate ROM II applications as well as TEXT, TELCOM, and BASIC. Lets you create your own BASIC programs using an 80-column display. (ROM-View 80 is not available for the Tandy 200. The complete TS-DOS disk-operating system is included in its place.)

- **T-Word** provides search and replace, overwrite, word count, hanging indentation, headers and footers, conditional paging, right justification. Fast text formatting by menu and by control codes. Provides three ways of previewing documents before printing, including a pixel page plot. Supports virtually all types of printers with such features as boldface, underline, condensed print. Merges everything from single words to complete files.

- **IDEA!** organizes anything from simple lists to complex outlines, allowing easy reorganization, sorting, and searching. Includes many database and word processing capabilities. New on this version: faster operation, a preview mode, and a template-generating feature. With LAPDOS, its files can be exchanged with ThinkTank files.

- **T-base** lets you design true relational databases, borrow information from seven other files, set up formulas for calculations. New on this version: faster operation; floating decimal; calculation of sines, square roots, etc.; conditional and logical calculations. T-base files can be exchanged with desktop programs like dBASE II and III, R:base 5000, and WordStar MailMerge.

- **Portable Disk Drive Support**, provided by a subset of the TS-DOS, lets you print and preview files directly from disk without loading them into your computer. With disk files, allows all of the merge operations possible with RAM files.

■ 1.9 Pound Portable Disk Drive . . for use with laptop and desktop computers

PURPLE COMPUTING
TS-DOS

The Purple Computing portable disk drive gives you fast access to 100K of information on 3½-inch disks, eliminating the cumbersome and slow process of cassette storage and retrieval. Weighing just 1.9 pounds and measuring only 6⅜ by 5¼ by 2⅛ inches, it's small enough to fit into your briefcase along with your laptop computer. Runs on four AA batteries or 6-volt AC adapter. Manufactured by the company that supplies the new Tandy Portable Disk Drive. Comes complete with TS-DOS for easy operation and with an AC adapter.

Complete package $229

■ TS-DOS . . . . for the Tandy 100/200, NEC PC-8201, and Olivetti M10

TS-DOS
TS-DOS

TS-DOS is a complete operating system for the Tandy and Purple Computing portable disk drives. It lists files both on disk and in RAM and lets you save to disk, load into RAM, kill, and rename files simply by selecting a file with the bar cursor and pressing a function key. A small portion of TS-DOS can be made RAM-resident, allowing you to save and load TEXT files to and from disk directly from TEXT (from the main menu of the NEC) and write BASIC programs that directly access disk files. It also lets you format disks, preview a file directly from disk, append files on disk to create a single file of up to 64K—even backup up the entire contents of a RAM bank at once. Occupies 4.9K of high memory (2.5K for the resident portion).

$69.95 or $49.95 if you buy or now own the Ultimate ROM II

■ LAPDOS . . . for the IBM PC, XT, AT and compatible computers

Portable Disk Drive
Portable Disk Drive
TRAVELING SOFTWARE
LAPDOS

Put LAPDOS in your desktop computer, connect the computer to your Tandy or Purple Computing portable disk drive, and you can easily exchange desktop and laptop files. It also features rename, view, and delete functions, and supports subdirectories on desktop computers, and formats portable drive disks. Operable in background, LAPDOS is always available no matter what desktop program you are using. Includes Xchange feature to exchange ThinkTank, SideKick, and WordStar files with those from IDEA! and other programs. Complete with cable converter for the RS-232C serial port.

$89.95 or $69.95 if you buy or now own the Ultimate ROM II

Programs on Cassette

Note: All programs on this page except T-backup are also available on 3½-inch disks (Tandy format) at $10 over the cassette price.

■ IDEA! . . . . for the Tandy 100/200, NEC PC-8201, and Olivetti M10

The outline processor that organizes anything from notes, appointments, and addresses to letters, business proposals, and essays. Allows for the quick entry of headings, subheadings, and unlimited amounts of text. Lets you manage information by easy move, copy, sort, and print features. (An enhanced version of IDEA! is part of the Ultimate ROM II.) Requirements: 16K of RAM, cassette recorder; printer optional. **$79.95**

■ T-base . . . . for the Tandy 100, NEC PC-8201, and Olivetti M10

The most powerful database available for these computers—ideal for billing and report forms, client profiles, inventory control, and many other applications. Uses TEXT files you design yourself to store data—no more fitting your data into files designed by others. Lets you borrow information stored in one file for use in up to seven other files. From formulas you set up, performs calculations with data you enter. From data in many files, produces anything from mailing labels to complex reports with column totals and subtotals. (An enhanced version of T-base is available on the Ultimate ROM II.) Requirements: 16K of RAM, cassette recorder; printer optional. **$99.95**

■ T-backup . . . . for the Tandy 100/200, NEC PC-8201, and Olivetti M10

The backup utility that transfers the entire contents of RAM to or from cassette in minutes. Eliminates the tedious and time-consuming task of backing up files individually. Stores the contents as a single file; then verifies that the backup copy is complete. Restores the backup copy as easily as it was saved. Saves all BASIC, TEXT, and machine-code files—even "invisible" files. Does not conflict with other programs and takes up little memory space (2K). Requirements: 8K of RAM, cassette recorder. **$19.95**

■ T-View 80 . . . . for the Tandy 100 and NEC PC-8201

A display-enhancement program that increases the number of characters you can view per line on the screen of your laptop computer. Displays up to 60 columns of characters at once—and scrolls to 80. Allows the entry of text in this enhanced mode for pasting into a new or existing file. With TELCOM, lets you send and receive files in the full 80-column format. (An enhanced version—ROM-View 80—is included with the Ultimate ROM II.) Requirements: 16K RAM, cassette recorder. **$39.95**

■ T-Writer . . . . for the Tandy 100/200, NEC PC-8201, and Olivetti M10

A popular and highly versatile print-formatting program. Up to 50 options in all, including centered lines, line justification, variable tabbing, headers and footers, boldface, condensed print, paging with or without numbers, and adjustable top, bottom, left, and right margins. Both function key commands and WordStar-like dot commands. Allows the merging of data files into boilerplate letters. Requirements: 16K of RAM, cassette recorder, printer. **$49.95**

■ Business Manager Series . . . . for the Tandy 100, NEC PC-8201, and Olivetti M10

Five products guaranteed to increase your business productivity: **The Traveling Appointment Manager** for schedules and prioritized lists of things to do; **The Traveling Expense Manager** for expenses, both business and personal, both billable and nonbillable; **The Traveling Project Manager** for tracking several projects at once; **The Traveling Sales Manager** for an efficient order-entry system; and **The Traveling Time Manager** for tracking time spent on projects or with clients. Call for details. **List $59.95; catalog special $39.95**

MS-DOS Programs on Disk

The programs on this page are designed for use on the new IBM PC Convertible and other laptop computers like the Kaypro 2000, Hewlett-Packard 110, Data General/One and for the IBM PC and compatible desktop computers. The programs are operated by a series of function key commands and provide "windows" for entering and viewing information. Their ease of use and functionality have led manufacturers to package our programs with their computers.

TRAVELING SOFTWARE
THE TRAVELING APPOINTMENT MANAGER™

Programs are sold on either $5^1/_4$- or $3^1/_2$-inch disks. When ordering, be sure to specify the model of your computer and the disk format it requires.

■ The Traveling Appointment Manager

A time-saving and easy-to-use method of tracking appointments and prioritizing business and personal tasks. Lets you set up appointments months or years in advance (through 1999), reminds you of upcoming appointments, informs you of scheduling conflicts, automatically reschedules recurring appointments, prints out schedules for any period you want—on some computers even sounds an alarm to alert you to an impending appointment. With the Traveldex feature, you can keep lists of names, addresses, telephone numbers, and other information, categorized as you want it. Dials telephone numbers automatically and prints mailing labels and lists according to the categories you specify. **List $99.95; catalog special $39.95**

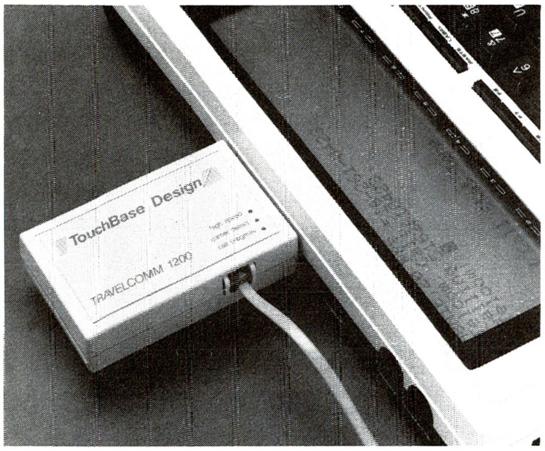
■ The Traveling Expense Manager

A complete system for the management of business and personal expenses. Generates company expense reports and identifies the ways in which you spend your money. Lets you set up the accounts, funds (cash, checking, VISA, etc.), and expense categories (meals, lodging, etc.) by which you will record each expense as it occurs. Lets you make expenses billable to certain clients, projects, etc. By reports and graphs, either on-screen or printed, monitors the status of your funds, accounts, and categories. Allows you to keep detailed automobile mileage records and computes reimbursements for you. Even keeps track of your checking account. **List $99.95; catalog special $69.95**

■ The Traveling Project Manager

The ideal tool for controlling the time and money spent on projects both big and small. Gives you flexibility in defining the activities and tasks of each project. Tracks start and end dates, both estimated and actual. Lets you record expenditures in dollars, in other units like man-hours, or in both. Monitors projects through a variety of reports that show everything from individual expenditures to summaries for each project.

List $99.95; catalog special $69.95



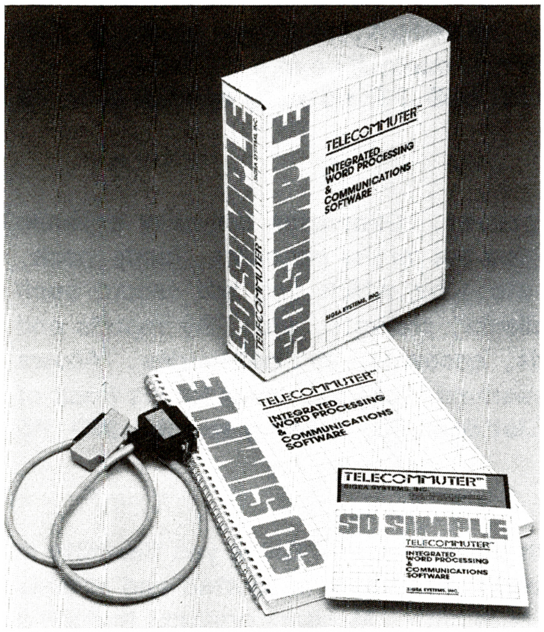
■ TravelComm 1200 Modem . . . . for use with almost any laptop computer

This 300/1200 baud modem is easy to operate: just plug it into your laptop computer's RS-232C serial port, connect a standard modular telephone jack, and you are ready transmit and receive! It operates on a standard 9-volt battery and, when through, automatically turns itself off to preserve battery life. About the size of a cigarette pack, it easily fits into a briefcase. Operates with almost any laptop computer, including the IBM PC Convertible, Tandy, Epson, Kaypro, COMPAQ, and NEC portables.

Regularly $299; catalog special $279

■ BlackJack Telephone Jack . . for use with any laptop or desktop computer

If you have been prevented from telecommunicating for lack of a modular telephone jack, this is for you: a 0–9600 baud portable modular jack that connects any computer modem to any standard telephone handset. It provides a direct (not acoustical) connection for improved telecommunications; preserves line sensitivity; and is insensitive to environmental noise. Eliminates the need for unreliable acoustic cups. Weighs less than $^{1}/_{4}$ pound. **$49**



■ Telecommuter Software . . . . for the IBM PC and compatible desktop and laptop computers

By far the easiest to use of any communications software available, the Telecommuter does not sacrifice any of the features found in products like Crosstalk or SmartCom II. Its Host Mode lets you control your unattended desktop computer over standard telephone lines from your laptop or other computer: upload and download files, run programs, execute DOS commands, run your own application program from your remote keyboard. With the null modem cable included with the product, it allows the fast transfer of files between desktop and laptop computers, with full prompting on both computer screens. Integrated with these operations is a complete word processor, modeled after the TEXT program built into the Tandy 100. Available on 5$^{1}/_{4}$- or 3$^{1}/_{2}$-inch disks for any IBM PC or compatible—either desktop computer or laptop computer like the Kaypro 2000, Data General/One, Toshiba T-1100, or the new IBM PC Convertible. (Please specify the make of computer when ordering.) Includes a 30-day, money-back guarantee. **$199**

TTXpress
TTXpress
Accessory Kit
TTX

■ TTXpress Printer Paper

Thermal paper for the TTXpress printer. Order by the roll and get 100 feet of $8^{1}/_{2}$-inch paper. Order by the sheet and get 100 sheets of $8^{1}/_{2}$ by 11-inch paper. (Please specify roll or sheet when ordering.)

Roll $7.00
Sheet $7.95

■ $3^{1}/_{2}$-Inch Disks

High-quality disks at low prices! Available in two formats: Single-sided for the Tandy and Purple Computing disk drives and double-sided for computers like the IBM PC Convertible, the Kaypro 2000, and the Data General/One. Sold in boxes of 10 disks. (Specify single- or double-sided when ordering.)

Single-sided $29
Double-sided $38

■ TTXpress Portable Printer . . . for use with almost any laptop computer

Just tuck the TTXpress printer and some paper into your briefcase, and you're ready to print on the road. Because it's thermal, it has fewer moving parts, for greater reliability. And with a built-in parallel interface, the TTXpress can connect to just about any portable computer. It prints clear text (with true descenders) and graphics on either roll or sheet paper, at 50 characters per second, and 40, 80, even 160 characters per line. Compatible with the Epson MX-80, it prints in condensed, enlarged, emphasized, and underline modes. Operates on 4 C batteries or with the AC adapter (included). Includes printer cable for the Tandy, NEC, and Olivetti laptop computers. Weighs only 2.2 pounds and measures 11 by $4^{1}/_{2}$ by $1^{3}/_{4}$ inches. Complete with paper, carrying case, and a 90-day warranty.

Catalog special $129

■ Carrying Bag

This dark brown, padded carrying bag is sturdy enough and just the right size to hold your laptop computer as well as a TTXpress printer or a portable disk drive, a TravelComm modem, and an AC adapter. It has two inside pockets, a zippered outside pocket, and an adjustable shoulder strap. Popular with laptop computer users on the go!

List $29.95
Special $19.95

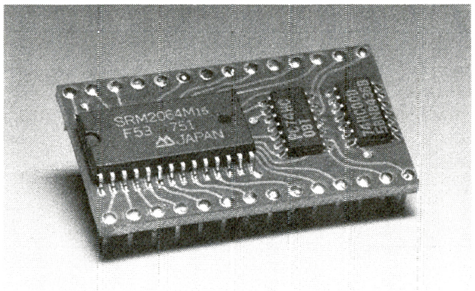
Memory Expansion Chips



■ 8K Memory Chip . . . . for the Tandy 100, NEC PC-8201, and Olivetti M10

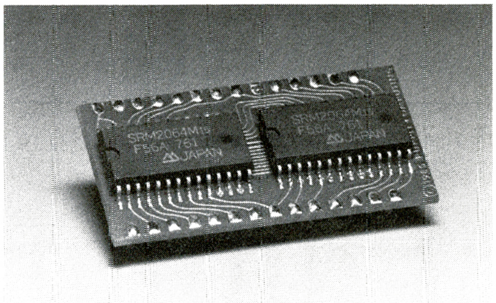
Easily installed in the RAM expansion sockets of these computers, expanding memory by 8,192 bytes per chip. Install enough chips to bring your Tandy 100 or Olivetti M10 up to 32K or your NEC PC-8201 up to 64K (32K per bank). In operation, uses little power, for long battery life. Two-year warranty.

$29 each or 3 for $78

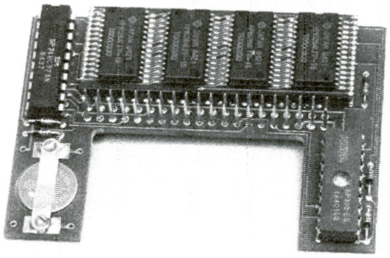
■ 24K Memory Chip . . . . for the Tandy 200

Installed in the Tandy 200 in less than two minutes—the only tool necessary being a coin to pop open the hatch. Install up to two of these chips to bring the Tandy 200 to 72K. Low power requirements, for long battery life. Pins made especially for the Tandy 200 expansion compartment. Two-year warranty.

$89 each or 2 for $170



Complete Memory Banks



■ 64K RAM Bank . . . . for the Tandy 100

Adds two full 32K RAM banks to the Model 100, making it possible to have a Model 100 with 96K of memory! Fits neatly into the ROM compartment, leaving the ROM socket free for software chips like the Ultimate ROM II. On computers already with 32K, provides a cassette-loaded program for the transfer of files from one bank to another, among other functions. A reliable product manufactured to precision by P.G. Design Electronics, it's fully guaranteed.

$375 or $325 if you buy or now own the Ultimate ROM II

■ 128K RAM SideCar . . . . for the NEC PC-8201

Attach to the expansion slot on the left side of your NEC PC-8201, and add four banks of 32K RAM—for a total of 192K when combined with 64K of internal memory. Shaped to conform to the shape of the computer and operates off two standard AA batteries for five to seven years. Select banks by a switch on the top of the case. Manufactured by Purple Computing, Inc., to strict government standards—a bargain for those needing lots of portable memory.

$275 or $235 if you buy or now own the Ultimate ROM II

◄ 1200 BAUD Portable Modem

(battery-operated and weighs only 6 oz.)

About the size of a cigarette pack, the TravelCom 1200 is a portable 300/1200 modem designed for use with virtually any laptop computer, including the IBM PC Convertible, Tandy, Epson, Kaypro, COMPAQ, and NEC portables. Simple to operate, the TravelCom 1200 will automaticaly turn itself on and off and will dial phone numbers. Just plug it into your computer's RS-232C serial port, connect a standard RJ11C phone cable, and you're in business! Runs on a standard 9 volt battery.

Regularly $299 **Introductory Special Only $279**

Complete 6-Pound Laptop System — $799 ►

An economical and powerful alternative to the new 12-pound, $1995 IBM PC Convertible: a complete 6-pound system that is IBM data-compatible for only $799! Here is what you get: an NEC PC-8201 laptop computer with 32K memory; a portable 3½-inch disk drive; TS-DOS disk software; A/C power adapter; Ultimate ROM II integrated software on a chip (word processing, relational data-base, idea processor, 80-column display, disk support); and a FREE padded carrying bag with shoulder strap. For $89.95 more, you get LAPDOS, our disk-operating system that allows you to operate the portable disk drive from your IBM PC or compatible computer. With LAPDOS you can easily exchange ThinkTank, SideKick, WordStar, and ASCII files with files you create on your laptop computer.
